Featuring: ***HX-12 HYDRO-EXCAVATION by Sewer Equipment***

**Armor Offers the**

### **RAMVAC HX-12 HYDRO EXCAVATOR**

**by Sewer Equipment of America!**

The RAMVAC truck-mounted vacuum excavator is built from the ground up to be the safest, simplest, and more maneuverable vacuum excavator on the market. When RAMVAC engineers began designing the HX truck mounted series, they called on end users (like you) to help them understand what is important in the field and on the road.

RAMVAC Air System is the secret behind our leading performance. It is designed to deliver air movement, while providing the max protection for the blower.

#### **The RAMVAC's Outstanding Features:**

**Boom:** Offers a 5' extension for a total reach up to 26' from the truck. Worm gear driven, with access to the receiver box, and an abrasion resistant steel at the back to absorb the impact from bulk material. Ability to dig 13' below grade utilizing 1 standard vacuum tube.

**Temperature Controlled Environmental Chamber:** The entire water system is enclosed in this insulated, heated compartment – heated by our 80,000 BTU heater.

**NEMA 4 Electrical System:** includes a dust & water-resistant control panel, rubber booted and o-ringed controls, loomed wiring, sealed automotive style connections & junctions, and common electrical ground.

**Independent Drive Systems for:** the Blower, the Water System and Auxiliary Hydraulics to ensure less wear & tear, as well as system separation.

#### **Dimensions of the HX-12 Hydro Excavator**

Length: 38'	Width: 8'	Height: 13'1"
Weight Empty: 43,030lbs	GVWR: 79,200lbs	
Boom Reach: 18'-23'	Capacity: 12yd	
Axle Configurations: Tandem, Pusher, or Tri Axle		

Armor's Bulletin Board

**Armor's Used Truck Inventory**
