

PT 1000™

High-Performance Rear Loader

PT 1000™

Affordable by design.

Heil's surprisingly affordable **PT 1000™** will change your thinking about rear loader performance. We put more than 60 years of Heil rear loader know-how and experience into a refuse collection vehicle that delivers the fastest cycle time in its class, an outstanding payload, and a best-in-class hopper. It also fits comfortably into today's increasingly restricted budgets.

Beneath its sleek exterior, the **PT 1000** is a no-nonsense machine that will outperform anything else in its class. It offers a 15-second cycle time and a reload time of less than 6 seconds, with packing forces that take full advantage of Heil's experience in high-pressure hydraulics and lighter weight, high-tensile steel construction.

The **PT 1000** features a large 3-cubic yard hopper that is the best in its class, making it the ideal vehicle for those occasional commercial pick-ups. It can be equipped with a variety of container

handling devices to suit just about any collection need. It also offers a payload density of up to 1,000 pounds per cubic yard, and a one-piece body sidewall that not only looks better, but also is easier to wash and maintain, resists rust and corrosion, and provides a smooth surface for signage.

The **PT 1000** is available in 13, 16, 18, 20, and 25 cubic yard models. Body sizes 20 cubic yards and smaller may be equipped as single axle models, which are FET exempt.

To add the proven **PT 1000** to your fleet, contact your local Authorized Heil Dealer. To find the Dealer nearest you, visit www.heil.com.

Shown with optional equipment

Proven Rear Loader Performance

With the fastest cycle time in its class, the proven **PT 1000™** can maximize your time on daily collection routes.

- **Smooth Sides** — **PT 1000** has smooth sides that provide optimal signage space for advertising.
- **Service Smart™ Design** — Easy-to-access UHMW wear parts enable longer component life while keeping the lowest total cost of ownership in mind.
- **Large Side Door** — Large side door offers ease of access for maintenance personnel to enter the body.
- **Superior Filtration** — Our 3-micron filtration system keeps hydraulic oil cleaner and extends the life of the hydraulic components. Other manufacturers use 10-micron filtration, which can allow particulate matter to damage the hydraulic system.
- **One-hand Manual Controls** — One-hand manual controls allow for full control of the packing cycle, which enables the operator to stop, start, and reverse the upper panel or blade at any point in the packing cycle.

*The PT 1000 is available with CNG.
Ask your Heil Dealer for details!*

High-Capacity Hopper

*When it comes to the mid-size rear loader, the **PT 1000** offers a large 3.0 cubic yard hopper that is key to optimizing productivity and easily handles even the bulkiest waste materials found in today's refuse collection applications.*

Packing Power

Heil's unique track design enables more compaction force per square inch utilizing the system pressure of 2750 psi to the maximum capacity and also delivering faster cycle times to expedite the operator's route time.

Electrical Control Box

The new power distribution electrical control box on the side of the body offers easier diagnostics of wiring issues and minimizes the need to cut into the chassis cab interior for wiring integration.

Optimized Body Weight

A payload density of up to 1,000 pounds per cubic yard and a body sidewall constructed of single sheet, high-tensile steel deliver long-lasting performance without unnecessary weight. The 13, 16, 18, and 20 cubic yard single-axle models are FET exempt and provide the lowest overall weight, the flexibility to get into and out of tight spaces, and an enhanced turning radius.

PT 1000™

High-Performance Rear Loader

Purchase your Heil unit through NJPA®

National Joint Powers Alliance (NJPA) has awarded Environmental Solutions Group (ESG), of which Heil is a part, a nationally bid contract for "Solid Waste and Recycling Collection Equipment with Related Equipment, Accessories, and Supplies."

Through the ESG contract (#060612-ESG), NJPA Members can purchase any of ESG's line of refuse and recycling equipment, including Heil front-loading, side-loading, and rear-loading refuse collection vehicles and roll-off hoists directly, without having to create an RFP and send the project through a duplicate bid process. By using the existing nationally bid contract, Members can receive the products they need more quickly and cost effectively.

Best of all, membership in NJPA is free! Qualified agencies can join online via the NJPA website at www.njpacoop.org.

To find out more about purchasing Heil equipment via the ESG NJPA contract, please contact your local Heil Dealer.

Trust Heil Certified OEM and aftermarket parts

Heil Certified OEM parts are the most reliable replacement parts for Heil refuse collection vehicles. They're made following the exact specifications and production processes on the same assembly lines as the parts originally installed on the bodies. This means that they fit perfectly every time. Heil uses only the highest-quality materials for parts that last — minimizing costly downtime. For more information on parts, please call **800.528.5308**.

Rely on experienced local support

When you buy from Heil, you gain the aftermarket support of the industry's strongest network of dealers in North America. We stand behind our products, so you get the support you need for the life of those products. Our dealers are also trained to help you find the best product for your particular route needs.

To find the dealer nearest you, visit our website at www.heil.com and click on "Dealer Locator."

Rent a Heil unit from Big Truck Rental

There are many reasons why renting your refuse trucks may be the perfect solution compared to purchasing vehicles for your fleet. Heil is pleased to partner with Big Truck Rental to offer short- and long-term rental options on our most popular refuse collection models, including front loaders, rear loaders, automated side loaders, and roll-off hoists.

Call your local Heil Dealer for more information or visit www.bigtruckrental.com.

Choose your DuPont® finish

Proven paint process

At Heil, we recognize that a quality paint finish requires a quality process and application. We have reviewed and refined our paint procedures to fully utilize the optimal characteristics of the paint and provide the finish and durability expected of Heil products. Heil uses a detailed process which includes:

1. Body surface prep
2. Joint sealer
3. Component powder-coating
4. Undercoating
5. DuPont paint

DuPont is the leader in commercial finishes, and Heil proudly uses DuPont primer and paint on all our refuse collection vehicles. Our priming and painting processes provide optimal adherence, durability, and corrosion resistance.

Count on the Lowest TCO

Refuse and recycling collection vehicles are our passion, and we apply tremendous resources to advance our product and service offerings to improve the profitability of your business and provide the lowest Total Cost of Ownership and the maximum return on your investment. You can be confident that choosing Heil equipment brings a long-term partnership with the industry leader.
