

PowerTrak[®] Commercial

High-Compaction Rear Loader

PowerTrak[®] Commercial

The ultimate garbage-gobbling machine.

What makes the PowerTrak Commercial the industry's ultimate garbage-gobbling collection vehicle?

A compaction rate of up to 1,200 pounds per cubic yard. Cycle times as low as 21 seconds. A 7- to 9-second reloading time. A huge 3.64 cubic yard hopper. When you add it up, one fact is inescapable: You will earn more with the **PowerTrak Commercial** because you can haul more with the **PowerTrak Commercial**!

And that's not just trash talk. When you factor in Heil's traditional low maintenance cost, minimal downtime, overall on-the-job efficiency, longevity, and high trade-in value, it's easy to see why the **PowerTrak Commercial** delivers the best return on investment in the solid waste industry.

The patented dual-track packing system is the heart of the PowerTrak design.

Other rear loaders move shoes or rollers along a single track during sweep and pack cycles. This requires the top cylinder to operate at a sharp angle of resistance, causing intense friction that robs power and speed and increases wear on shoes and tracks. The **PowerTrak Commercial's** revolutionary dual-track system gives the top cylinder its own track, significantly reducing the angle of resistance. This reduces friction and improves cycle times because more pressure is exerted directly onto the load, giving you incredibly long life from the aluminum/bronze alloy slide shoes.

Shown with optional equipment.

Time-Tested Performance

The **PowerTrak® Commercial** is built on the time-tested DuraPack® body offering many more performance advantages:

- **Extra Packing Power** — High-pressure hydraulics deliver extra packing power and reduce friction without sacrificing performance. Because the **PowerTrak Commercial** uses 2,500 psi operating pressure, smaller cylinders can deliver extra punch with faster cycle times than other commercial rear loaders, packing up to 1,200 pounds per cubic yard.
- **Easy Maintenance** — Hydraulic tubes are routed inside rear bolsters for added protection, yet are easily accessible for service.
- **Twice the Life** — Our cast alloy ejector shoes are easy to service and can be changed without removing the ejector panel. What's more, the shoes are reversible for twice the life.
- **Lower Overall Weight** — The **PowerTrak Commercial's** high-tensile strength steel construction delivers maximum life with lower overall body weight for better payloads and less stress on chassis components. For added durability, AR400 steel is used in areas of the tailgate that are subject to the greatest stress and wear.
- **Flexibility** — Although the **PowerTrak Commercial** was originally designed to handle commercial waste, it has become a popular choice for residential collection. The loading sill height is 4½ inches below the chassis frame rails (2¼ inches with commercial container mechanisms).

Superior Payload Density

High-pressure hydraulics and the dual-track design exert more force on the trash and less on the truck, providing superior compaction up to 1,200 pounds per cubic yard.

High-Capacity Hopper

*When handling commercial containers, hopper size is key to your productivity, which is why the **PowerTrak Commercial** is designed with a 3.64 cubic yard hopper that handles construction, demolition, and bulk waste with ease.*

Durability and Longevity

Our exclusive fully welded interlaced subframe provides exceptional longevity, while resisting abrasion, corrosion, and salt damage. The body is constructed of 7- to 8-gauge high-tensile strength steel, while the hopper features 5/16-inch thick AR400 steel on the floor and 3/16-inch thick AR400 steel on the sides for superior strength and durability.

Training

Smart business operators realize that time invested in training employees pays great dividends. Well-trained employees work smarter and are more productive. Heil training is tailored specifically to the vehicles you operate and helps your mechanics and operators make the most of your investment.

Purchase your Heil unit through NJPA®

National Joint Powers Alliance (NJPA) has awarded Environmental Solutions Group (ESG), of which Heil is a part, a nationally bid contract for "Solid Waste and Recycling Collection Equipment with Related Equipment, Accessories, and Supplies."

Through the ESG contract (#060612-ESG), NJPA Members can purchase any of ESG's line of refuse and recycling equipment, including Heil front-loading, side-loading, and rear-loading refuse collection vehicles and roll-off hoists directly, without having to create an RFP and send the project through a duplicate bid process. By using the existing nationally bid contract, Members can receive the products they need more quickly and cost effectively.

Best of all, membership in NJPA is free! Qualified agencies can join online via the NJPA website at www.njpacoop.org.

To find out more about purchasing Heil equipment via the ESG NJPA contract, please contact your local Heil Dealer.

Trust Heil Certified OEM and aftermarket parts

Heil Certified OEM parts are the most reliable replacement parts for Heil refuse collection vehicles. They're made following the exact specifications and production processes on the same assembly lines as the parts originally installed on the bodies. This means that they fit perfectly every time. Heil uses only the highest-quality materials for parts that last — minimizing costly downtime. For more information on parts, please call **800.528.5308**.

2030 Hamilton Place Blvd., Suite 200, Chattanooga, TN 37421

Rely on experienced local support

When you buy from Heil, you gain the aftermarket support of the industry's strongest network of dealers in North America. We stand behind our products, so you get the support you need for the life of those products. Our dealers are also trained to help you find the best product for your particular route needs.

To find the dealer nearest you, visit our website at www.heil.com and click on "Dealer Locator."

Rent a Heil unit from Big Truck Rental

There are many reasons why renting your refuse trucks may be the perfect solution compared to purchasing vehicles for your fleet. Heil is pleased to partner with Big Truck Rental to offer short- and long-term rental options on our most popular refuse collection models, including front loaders, rear loaders, automated side loaders, and roll-off hoists.

Call your local Heil Dealer for more information or visit www.bigtruckrental.com.

Choose your DuPont® finish

Proven paint process

At Heil, we recognize that a quality paint finish requires a quality process and application. We have reviewed and refined our paint procedures to fully utilize the optimal characteristics of the paint and provide the finish and durability expected of Heil products. Heil uses a detailed process which includes:

1. Body surface prep
2. Joint sealer
3. Component powder-coating
4. Undercoating
5. DuPont paint

DuPont is the leader in commercial finishes, and Heil proudly uses DuPont primer and paint on all our refuse collection vehicles. Our priming and painting processes provide optimal adherence, durability, and corrosion resistance.

Count on the Lowest TCO

Refuse and recycling collection vehicles are our passion, and we apply tremendous resources to advance our product and service offerings to improve the profitability of your business and provide the lowest Total Cost of Ownership and the maximum return on your investment. You can be confident that choosing Heil equipment brings a long-term partnership with the industry leader.
